

Airport Environmental Specialist

Dieppe, New Brunswick

The Greater Moncton Romeo LeBlanc International Airport (YQM) is a progressive airport centrally located in Dieppe, NB. We strive to provide superior air service to passengers and the global cargo industry while ensuring the environment and safety remain top priorities. We take pride in our environmental stewardship and strive for continual improvement. In line with our priorities, the Airport is seeking an Environmental Specialist for an approximate 13 month term to provide leadership in meeting and exceeding environmental goals. Responsible for the maintenance and improvement of the airport environmental management system, the Environmental Specialist manages key environmental issues pertaining to airport operation, lands and facilities while ensuring compliance with all applicable environmental legislation.

The Responsibilities of the Airport Environmental Specialist include:

- ✓ Monitor and maintain the airport Environmental Management System.
- ✓ Ensure compliance with all applicable Federal, Provincial and Municipal environmental regulations and standards.
- ✓ Administer the airport bird and wildlife management program.
- ✓ Administer the airport glycol mitigation plan as well as other programs including: noise management, potable water and forest management.
- ✓ Conduct field work including effluent water sampling, field and facility inspections and wildlife mitigation.
- ✓ Administer tenant and contractor environmental guidelines.
- ✓ Maintain participation within internal and external environmental and bird strike committees (some travel possible).
- ✓ Maintain participation and compliance within volunteer environmental programs.
- ✓ Advise management on all changes to related environmental legislation.
- ✓ Administer all necessary audits as part of the environmental management program.
- ✓ Coordinate airport response and resources for airport emergencies of an environmental nature.
- ✓ Administer and/or deliver environmental training.
- ✓ Liaise with government officials as required.
- ✓ Other duties as assigned.

Qualifications

- Completion of a bachelor degree or college diploma in environmental science or environmental engineering is preferred.
- Qualified in the field of environment with advanced knowledge and applied experience of federal and provincial environmental legislation.
- Demonstrated experience with organising committees and working with customers.
- Demonstrated ability to use initiative to achieve results.
- Proven innovation to problem solve with the willingness to work independently.
- Advanced knowledge of computer software (MS Office).

Applicants can email resumes to admin@cyqm.ca.

This position is within the collective bargaining unit (UCTE) for the Greater Moncton International Airport Authority (GMIAA).
